

Use myITprocess™ Software To Become Your Clients' TruBusiness Partner

Improve Client Results And Internal Efficiency

As an MSP, you need to do more than just provide services to your clients – you need to understand their businesses and provide strategic guidance. The revolutionary myITprocess™ software enables you to offer high-value vCIO (virtual CIO) services for your clients.

Using myITprocess™ will help you:

- ✓ Close more sales
- ✓ Improve client retention
- ✓ Increase the prices you charge
- ✓ Grow your overall MRR (monthly recurring revenue)

Do More With myITprocess™

The myITprocess™ software gives you tools to become a proactive MSP. It enables you to efficiently monitor and maintain your clients' tech stacks, as well as streamline your own operations.

Establish IT Standards

Use our built-in library or create your own technical standards in one centralized platform. Keep your clients' technology compliant across all environments.

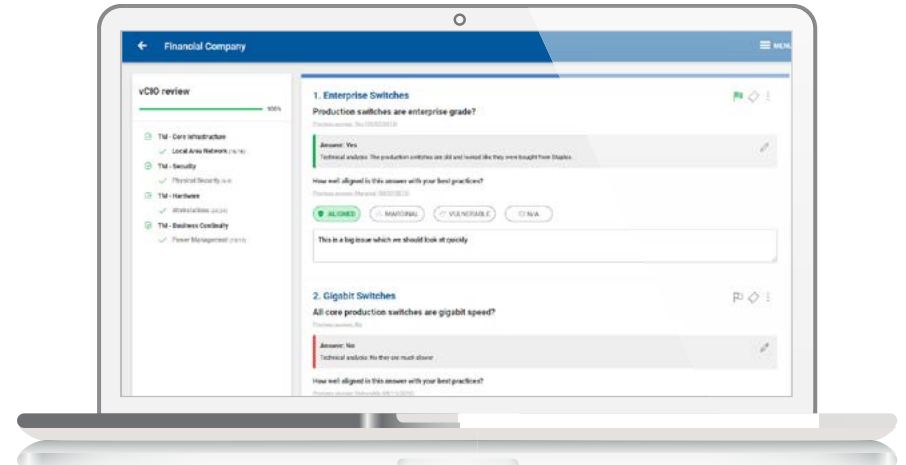

Create Alignment

Enable your engineers and vCIOs to keep track of clients' technologies through alignment reviews. Evaluate each element, then identify and fix misaligned elements. Give your client a scorecard with the key results of their alignment review.

Develop Strategic Roadmaps

Build and deliver strategic plans and budgets for current clients based on their technology misalignments and business priorities.

Get Better Results With myITprocess™

With myITprocess™, you can:

- Reduce the number of tickets submitted by two-thirds
- Prevent problems that can result from unmonitored updates
- Act as a vCIO, recommending short- and long-term changes to technology stacks based on evolving standards

By providing top-notch service, you'll attract more clients and keep them longer, which can have a dramatic impact on your bottom line.

See for yourself exactly what myITprocess™ can do for you. ▶
